Module Aims, Learning Outcomes and Indicative Contents

أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية

Module Aims أهداف المادة الدراسية	1. The study of fundamentally discrete mathematical structures, in the sense of not supporting the concept of continuity. 2. Studying computer data representation methods that achieve easy storage and retrieval and processing speed. 3. Logical formulas are described by the discrete structure, which is used to create directed acyclic graph structures and finite trees. A finite set is produced by the truth values of logical formulas.
Module Learning Outcomes مخرجات التعلم للمادة الدراسية	1. The ability to develop and conduct appropriate experiments, analyse and interpret data, and use engineering judgment to draw conclusions 2. Ability to acquire and apply new knowledge as needed, using appropriate learning strategies. Topics include: sets, number bases, mathematical induction, relations, functions, graphs, trees,
Indicative Contents المحتويات الإرشادية	Indicative content includes the following. ➤ Set theory • Sets and subsets • How to specify sets, Operations on sets • Algebra of sets and its proves • Power set, Classes of sets, Cardinality • Sets of numbers, Finite sets and counting principle ➤ Mathematical induction ➤ Relations • Computer representation of relations and Digraph • Manipulation of relations, Properties of relations • Composition of relations ➤ Functions • Type of function (one-to-one & invertible function) • Geometrical characterization of functions • Sequences of sets, Recursively defined functions ➤ Graphs • Definition, Graphs. 	- polish notation, with examples ➤ Finite state machines - Finite automata - Optimistic approach to construct FSM - Deterministic Finite state automata
Learning and Teaching Strategies استراتيجيات التعلم والتعليم	
Strategies	The main strategy that will be adopted in delivering this module is to: - Encourage students' participation in the exercises, while at the same time refining and expanding their critical thinking skills. This will be achieved through classes, interactive tutorials and by considering type of simple experiments involving some sampling activities that are interesting to the students. - Use Live electronic lectures - video lectures - Solve practical examples

مخطط الدرجات				
Group	Grade	التقدير	Marks (%)	Definition
Success Group (50 - 100)	A - Excellent	امتياز	90 - 100	Outstanding Performance
	B - Very Good	جيد جدا	80 - 89	Above average with some errors
	C - Good	جيد	70 - 79	Sound work with notable errors
	D - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	E - Sufficient	مقبول	50 - 59	Work meets minimum criteria
Fail Group (0 – 49)	FX – Fail	مقبول بقرار	(45-49)	More work required but credit awarded
	F – Fail	راسب	(0-44)	Considerable amount of work required
Note:				
NB Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.
